R Studio Setup
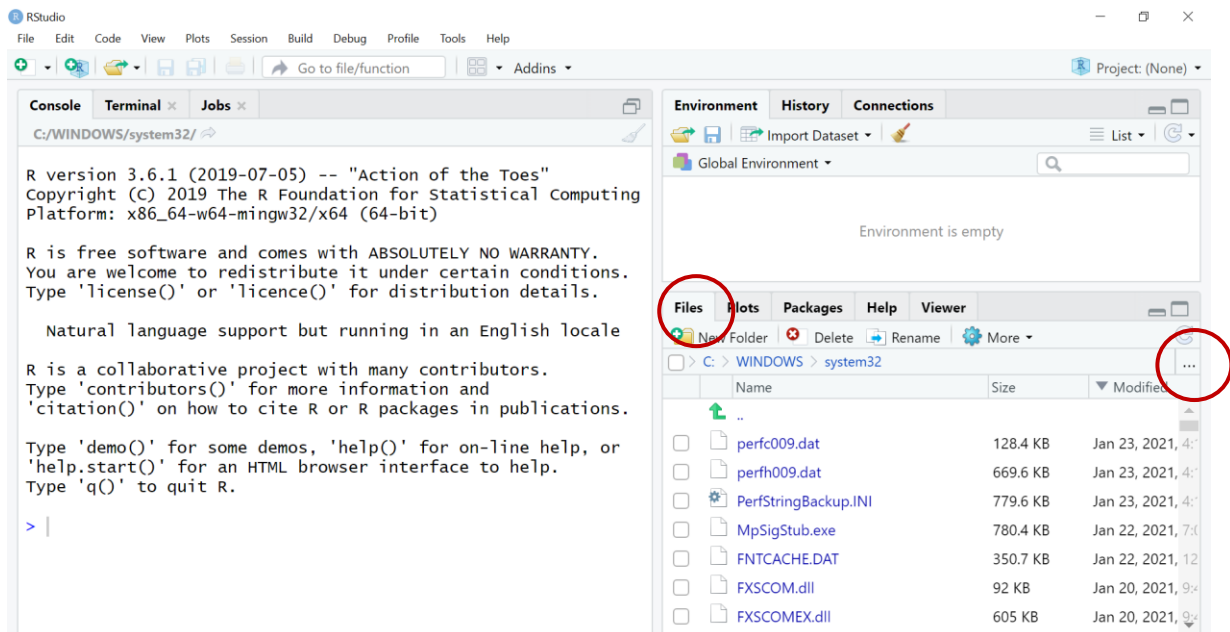

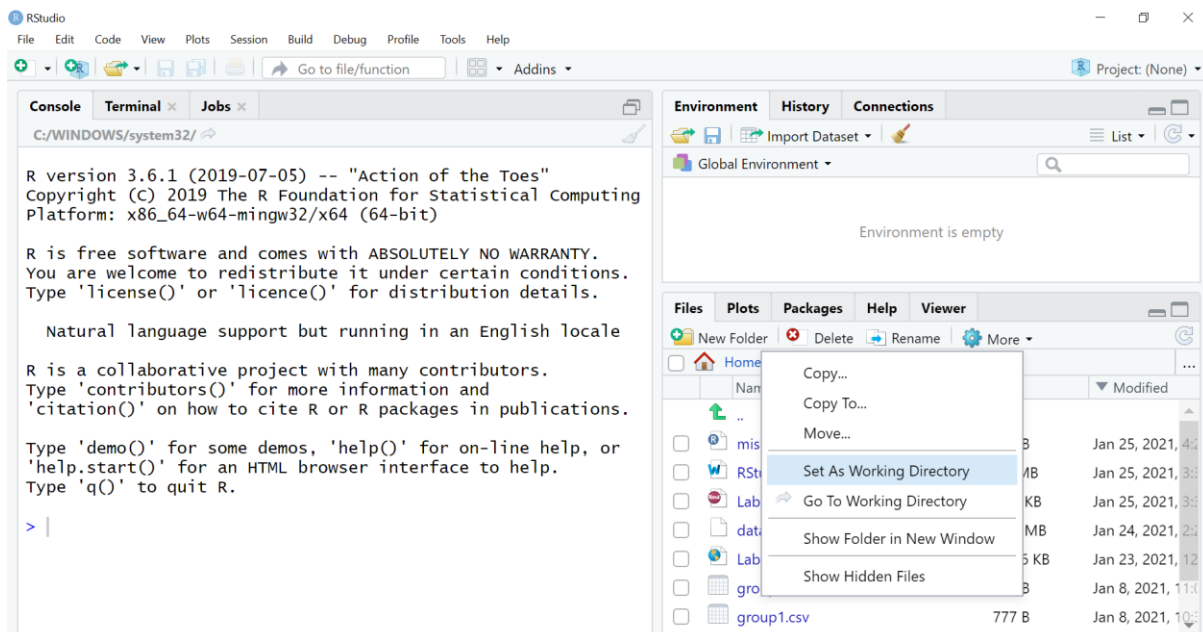

Make sure that the Files tab is selected and click on the "…" symbol. This will open a browser window, navigate to the folder containing Lab1.Rmd and the data subfolder you extracted from data.zip and click open. (Don't navigate any further than the folder you created for the labs, just highlight that folder and click open.)

Go to Files > More > Set As Working Directory.

Read sections 1 and 2 of Lab_1_Introduction_to_R.qmd ahead of the lab and make a note of any questions you have to ask your tutor at the start of the lab.
